Application No. 10/627,970
Amendment dated May 16, 2005
Reply to Office Action of February 17, 2005

Amendments To The Abstract:

Please replace the Abstract at present on file with the following Abstract:

An internally cooled turbine blade including at least one deflector extending into an air cavity generally from said first wall towards the a second wall for diverting cooling air away from the first wall and generally towards the second wall to thereby improve cooling flow distribution among a plurality of cooling path inlets.
